-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Barz [US 6,195,244].

Regarding claim 1, Barz discloses a mounting structure for an electronic module (figure 5), comprising:

- a circuit board (7) having electrical component (6) mounted on an upper surface and at least one first through hole mounted therein (figure 5);
- a box-shaped (1) having a cover portion cover and at least one leg portion (11) projected downward from the cover portion (figure 5) and attached to the circuit board while covering the electrical components;
- a motherboard (2) for mounting the circuit board thereon (figure 5) and having at least one second through hole mounted therein (figure 5); and
- wherein the leg portion is inserted and soldered through the first and second holes, respectively (figure 5).

Regarding claim 2, Barz further discloses the circuit board being overlap the motherboard (figure 5).

Regarding claim 3, Barz further discloses conductors (40) being provided on the walls of the at least first and second through holes and the at least one leg portions being soldered to the conductors (401, figure 5).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Barz in view of Gessman [US 5,559,676].

Regarding claim 4, Barz disclose the instant invention except for the specific shaped of the leg portion.

Gessman discloses a mounting structure for a module (figures 6 or 1) having a leg portion (76 or 22) being inserted into first and second through holes (figure 6) with a straight line shape.

It would have been obvious to a person having ordinary skill in the art at the time the invention was made to use the leg portion design of Gessman for the leg portion of Barz, for the purpose of enabling assembly of the mounting structure.
